

AIR PURIFIER HALO USER MANUAL

Dear customers,

Thank you for purchasing Afloia Air Purifier.

Please keep this User Manual for your reference.

This manual will guide you if you have any questions or troubleshooting problems.

Top Features of Afloia Air Purifier

- **Air Purification**
This air purifier can filter out airborne dust, allergens and more well with the mounted true HEPA 3-stage filter at the bottom.
- **True HEPA 3-Stage Filter**
The 3-stage filtration (the pre-filter, H13 HEPA filter, and activated carbon filter) helps you to improve air quality more efficiently.
- **LED Light**
You may choose 2 brightness of the LED night light (which can be turned off).
- **Adjustable Fan Speed**
You may choose among 3 levels of fan speed. The fan at the lowest noise level will run quietly and won't disturb your daily life and sleep.
- **Timer Setting**
You can set the timer for 2-4-8 hours depending on preference.
- **Filter Replacement Indicator**
The built-in replacement indicator reminds user when the filter needs to be replaced.

Please read the instructions carefully before using the product and keep them properly.

How to Replace Filter

* Note :

- Please remove the packaging from the filter before using it.
- Ensure the air purifier is unplugged before removing or installing the filter.
- Please wipe the dust on the filter regularly, do not wash or use it repeatedly.
- Please do not use other filters that are not designed for this air purifier.

- 1 When the lamp ring flashes in red, it means the filter needs to be changed. We highly recommend replacing the filter at least once each 3 to 6 months.

- 2 Rotate the base along the direction marked OPEN.

- 3 Take out the old filter from the air purifier

- 4 Remove the packaging around the new filter.

How to Replace Filter

- 5 Place the new filter into the base of the air purifier.

- 6 Place the base back, rotate and tighten the base along the direction marked CLOSE.

* Note
Failure to properly place the filter and base on the air purifier, may result in air purifier not working properly.

Resetting the Filter Replacement Alert

When the air purifier detects that the filter reaches the saturation value, the lamp keeps flashing red.

Please press the power button for 7 seconds to reset the filter replacement alert after installing a new filter.

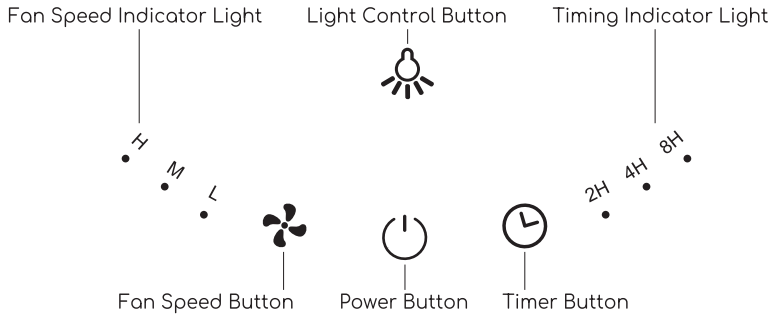

If it is the first time using the air purifier, do not reset it.

Maximum Purification Efficiency

In order to keep the best purification effect, it is recommended to keep the air purifier standing on the floor and keep it at least 1ft (30cm) away from the wall.

Names and Functions of Control Panel

* Note

When the air purifier connects to the power outlet, it will beep for once, the lamp will turn on for 1 second and then turn off, this means that the air purifier is powered on.

Button Description

Power Button

1. Touch the power button once to turn on the air purifier, it will beep and the lamp will be turned on, the default fan speed will be low.
 2. Touch the power button again, the air purifier will beep for once, then turn off, the fan will stop working.
- (Note: Without unplugging the power plug, turn off the air purifier and turn it on again, the fan speed defaults to the working state before shutting down.)

2H-4H-8H

Timer Button

1. To use the timer, press the timer button until you reach desired timer time. You can switch between 2H (2 hours), 4H (4 hours), or 8H (8 hours).
 2. When the timer is up, the air purifier will turn off, the fan will stop working.
- (Note: if switch off the timer indicator, the air purifier will work continuously.)

Names and Functions of Control Panel

H-M-L

Fan Speed Button

There are 3 options for fan speed: H or High, is the fastest fan speed. M or Moderate, is the second fastest fan speed. L or Low, is the lowest fan speed and most quiet.

To switch the fan speed, press the fan speed button until you reach desired fan speed.

Light Button

There are 3 light brightness mode you can option: standard, dimmed, and off.

Press the light button until you reach your desired brightness preference.

(Note: the light can be controlled independently without turning on the air purifier.)

Connect the Power

Please confirm that the input voltage is AC120V 60Hz, and ensure that the power plug and your hands are dry before you insert the power cord plug into the outlet.

Note: Contact Customer Service when the power cord or plug is damaged or the power outlet is loose.

We strongly recommend that the damaged parts be repaired or replaced.

To replace the damaged power cord or plug, please visit Aflora website and contact Customer Service.

Air Purification

※ The picture may differ from the actual product.

True HEPA 3-Stage Filter	
Stage 1	Pre Filter
Stage 2	True HEPA
Stage 3	Active Carbon Filter

About the Filter

True HEPA 3-Stage Filter	Pre-Filter	It removes large dust, hair, fur which maximizes the filter's life.
	True HEPA	It removes at least 99.97% of particles as small as 0.1 microns such as smoke, dust pollen, dander and mites.
	Active Carbon Filter	It absorbs unpleasant odors, harmful gases, food smell, cigarette smoke, fur, and VOCs

Filter Replacement Cycle

We recommend replacing the filter every 3-6 months. However, you may need to change your filters sooner or later depending on use frequency and air quality. For buying more filters, please visit Aflora website and contact Aflora customer service.

Maintenance

- Ensure the air purifier is unplugged before maintenance.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) to clean any part of the unit.
- Do not wash the filter.
- Do not use a vacuum cleaner to clean the filter.

Cleaning and Storage

- Ensure the air purifier is powered-off and unplugged.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the air purifier and air intake/vent.
- If you do not use it for a long time, please turn on the air purifier for a few minutes from time to time to ensure a good performance.
- Please do not drop any water into the air purifier when cleaning the air outlet.

* Please comply with the 'Caution' as they are provided to ensure safe and proper use of the product and prevent accidents and dangerous situations.

Safety Instructions

Introduction

Thank you for choosing a device from Afloia.

Intended use

- The device is used exclusively for cleaning the ambient air indoors.
- Please read these operating instructions before using the machine and please follow the safety instructions. The operating instructions must be kept available at all times.

Safety instructions

- Keep packing material, such as plastic wrapping, away from children! (Risk of suffocation)
- Please follow the safety instructions to prevent fire or electric shock. Only use the device indoors.
- Only use a socket that supplies the correct voltage (see rating plate).
- Do not modify or repair the device.
- Do not use the device if the power cable or mains plug is damaged or if the connection at the socket is not stable.
- Make sure that the power cable does not get crushed while you are using the device and that it cannot be damaged in any other way. Place the cable so that no one will trip over it. Do not pull the power cable tight.
- Disconnect the plug from the socket for cleaning purposes and whenever the device is not in use for a significant period of time.
- Do not touch the plug or the device if you have wet hands.
- Do not spray any insect repellent.
- Do not use in rooms where the device may come into contact with fuel vapour, oil vapour or metal dust.
- Do not use any volatile liquids, petroleum, kerosene, paint thinner or polishing paste to clean the device. Such liquids may damage the surface of the device.
- Do not expose the device to rain, water, moisture or high humidity, and do not set it up in a bathroom or kitchen next to a sink.
- Make sure that no foreign objects get into the outlet grilles.
- Do not use near a naked flame or sparks.
- The device is not suitable for removing harmful gases (carbon monoxide, e.g. from heating appliances).
- Unless they are supervised, the device must not be used by those (including children) with reduced, physical, sensory and mental abilities or who do not have the required experience and knowledge.

Caution

Safety Instructions

Safety instructions

- Do not block the air intake or outlet.
 - Do not expose the air purifier to direct sunlight, a naked flame or heat.
 - Only use the air purifier in living quarters and within the specified technical parameters. Improper usage may pose a threat to life and health.
 - Do not use the device near a smoke detector. Air blowing towards a smoke detector could delay the alarm or not trigger at all.
-

Caution

- Risk of injury due to electric shock.
Always disconnect the mains plug prior to :
- Maintenance and cleaning
 - Moving the device
 - Changing the filter
-

Caution

- Do not use any spray cans with flammable contents near to the air purifier!
-

Caution

- Do not use any flammable cleaning agents

- ▼ Not following this user manual may result in your device not working. Please read the following measures accordingly if you are having problems with your device. If you are still having problems, please contact our Customer Service Centers.

Problem	Checklist	Recommendation
The product won't work even if I press the Power button.	Are you in a black out?	Check the power supply.
	Is the power cord plugged into the power outlet?	Put the power plug in a power outlet.
No air is blowing out.	Is there material blocking the intake or air vent?	Remove material from vent/intake. Check if plastic packaging has been removed from filter.
	Is the air purifier placed where the intake or blocked preventing air from moving freely?	Remove objects blocking the air purifier or place it elsewhere.
	Air purifier is on but fan does not work.	Unplug from the wall and contact Afloia customer service: service@afloia.com
Loud Noises	Is there anything stuck in the fan or air intake/vent?	Please remove any objects you see from the fan intake/vent.
	Is the air purifier tilted on its side?	Make sure the base is level on a flat surface.
	Is the fan really loud?	Set your air purifier to a lower fan speed to reduce the noise.

Troubleshooting

Problem	Checklist	Recommendation
Coming out nasty smell	Is the air purifier in a place with a lot of smoke and odor?	The performance of the air purifier may decrease over time if there is excessive smoke and odor in the area. To remedy this, please air out the room before using the air purifier.
	Should I clean or replace my filter?	Check the filter replacement indicator and clean or replace the filter if necessary.
	Do you smell plastic?	It is common that in the first uses the smell of plastic will be emitted. It will eventually go away. If not, please contact our customer service centers.
	Is there a burning smell?	Turn off your air purifier, unplug it from the wall and contact our customer service center.
The air purifier is not purifying the area well.	The air purifier may be placed in an area with no ventilation, or there is an obstacle near it.	Ventilate the room and then use the product. Use the product in an area not exceeding its coverage limit. (Avoid placing the device where it is well ventilated like a door or window.)
	Is there any dust in the pre-filter?	Wipe the Pre-Filter
	Are there any objects blocking the air intake/vent?	Please remove any objects from the intake/vent.
	Have you removed the filter from it's packaging?	The plastic bag of the filter may not have been removed, so please open the cover and check if the plastic bag is removed.
	Is the filter dusty? Maybe it is time to replace the filter.	Change the filter if it looks like it needs to be replaced.
	Is intake/vent dusty?	Clean the air vent/intake.
The filter replacement alert is still blinking after I changed the filter.	Have you reset the filter replacement alert?	Press and hold the power button for 7 seconds to reset the filter replacement alert.

Note : If these suggestions do not work accordingly, please contact Aflora customer service and await instructions. Do not disassemble, repair or fix anything by yourself.
